

Claims

[c1] 1.A hat container for holding a plurality of stacked billed hats comprising:

(a)a bill portion;

(b)a crown portion;

(c)a door pivotally connected to said crown portion;

(d)a stabilizer; and

(e)a closure

wherein said bill and crown portions and said door define an internal cavity, comprising a bottom surface, a top surface and sides, said cavity being sized to accommodate the plurality of stacked billed hats.

[c2] 2.The hat container of claim 1 further comprising a convex shape-retaining element.

[c3] 3.The hat container of claim 1, wherein the door comprises a concave depression.

[c4] 4.The hat container of claim 1 further comprising a loop for hanging or carrying the hat container.

[c5] 5.The hat container of claim 1, wherein the stabilizer is a rim extending from the edge of the door.

- [c6] 6.The hat container of claim 5, wherein the stabilizer prevents water from entering the internal cavity.
- [c7] 7.The hat container of claim 1, wherein the closure is a latch.
- [c8] 8.A hat container for holding a plurality of stacked billed hats comprising:
(a)a bill portion;
(b)a crown portion;
(c)a door pivotally connected to said crown portion;
(d)a closure; and
(e)a convex shape-retaining element,
wherein said bill and crown portions and said door define an internal cavity, comprising a bottom surface, a top surface and sides, said cavity being sized to accommodate the plurality of stacked billed hats.
- [c9] 9.The hat container of claim 8, further comprising a stabilizer.
- [c10] 10.The hat container of claims 9, wherein the stabilizer is a rim extending from the edge of the door.
- [c11] 11.The hat container of claim 9, wherein the stabilizer prevents water from entering the internal cavity.
- [c12] 12.The hat container of claim 8, wherein the door com-

prises a concave depression.

[c13] 13.The hat container of claim 8 further comprising a loop for hanging or carrying the hat container.

[c14] 14.The hat container of claim 8, wherein the closure is a latch.

[c15] 15.A hat container for holding a plurality of stacked billed hats comprising:
(a)a bill portion
(b)a crown portion;
(c)a door pivotally connected to said crown portion;
(d)a stabilizer; and
(e)a closure,
wherein said bill and crown portions and said door define an internal cavity, comprising a bottom surface, a top surface and sides, said cavity being sized to accommodate the plurality of stacked billed hats, and wherein said door comprises a concave depression.

[c16] 16.The hat container of claim 15 further comprising a convex shape-retaining element.

[c17] 17.The hat container of claim 16, wherein the stabilizer is a rim extending from the edge of the door.

[c18] 18.The hat container of claim 17, wherein the stabilizer

prevents water from entering the internal cavity.

- [c19] 19.The hat container of claim 18 further comprising a loop for hanging or carrying the hat container.
- [c20] 20.The hat container of claim 19, wherein the closure is a latch.
